

Selling templates

If you're a frequent eBay seller, you can simplify how you create high-quality listings with reusable templates.

Listing templates allow you to give your buyers more consistent information across all the items you have for sale, as well as making it easy for you to manage your listings.

With listing templates you no longer have to start from scratch every time you list an item. They also help ensure that you give buyers consistent information across all your listings. Once you have set up a template, it's easy to revise, rename, or delete it.

You can create reusable listing templates from

[Seller Hub](http://www.ebay.com/sh/landing) - opens in new window or tab

Creating templates in Seller Hub

To create a template:

- Go to [Listing templates](http://bulkedit.ebay.com/ManageTemplates) - opens in new window or tab

- in Seller Hub and select Create new template.
- Name your template so you'll remember the type of item it covers.
- Add in the rest of your listing details.
- Preview or Save the template.

You can create up to 50 different templates. To create a listing from your template:

- Go to [Listing templates](http://bulkedit.ebay.com/ManageTemplates) - opens in new window or tab

- in Seller Hub.
- Select Create listing from the Actions dropdown menu.
- Create your listing.
- From the Actions dropdown you can also edit, delete, and copy your template.
