

INV - DSR manipulation (feedback attacks)

GUIDE.SUMMARY What Manipulating another members detailed seller ratings (DSRs) through a combination of repeat purchases and low DSRs to reduce another users Feedback scores, or showing a pattern of leaving positive Feedback with consistently low DSRs is not allowed. Our Feedback system allows members to rate each other after a transaction. It's a way to earn a good reputation as a buyer and seller on our web site. To make sure this system runs as smoothly and as fairly as possible, we have rules on how it's used. Of course, we don't allow manipulating Feedback or detailed seller ratings (DSRs) in any way.
