

## Updating your personal information

If you change your phone number or email address, you'll need to update them on your eBay account. If you change any other personal details, you'll need to update them on Payoneer, and your eBay account details will be synched automatically. You can change your phone number, email address, or User ID in My eBay. Here's how:

- Go to the Account section of My eBay.
- Select Personal information.
- Find the section you need to update, and select Edit. Enter your new details.
- Depending on what you're updating, you'll be prompted to Save, Submit, or Confirm.
