 Summary The simplified listing flow used to list on

eBay (internally, "Gandalf") Not covered: The SYI form Related links Help pages; CSKB content Talking points FAQs about how to use the QLT Detailed information A list of features in the QLT versus the SYI form; special flows for selling vehicles or cell phones Not covered: The SYI form Instructions / Steps to resolve How to list using the QLT <h2><h2>GUIDE.TALKING_POINTS How to access / exit: You can access the Quick Listing Tool by clicking Sell
at the top left of most eBay pages. You can also use this direct link:
http://www.ebay.com/sl/sell On both the quick and advanced listing tool experience, there's a link on the top right of the listing form to switch to the other form. Internal information Only C2C / My eBay sellers will see the options to switch between forms. Seller Hub or B2C sellers will not have the option to switch to another form from the advanced listing tool experience (Helix)
 Switching from Quick Listing Tool to the advanced listing tool experience (Helix) Switching from the advanced listing tool experience (Helix) to Quick Listing Tool (BOLT) From the advanced listing tool experience, click the three dots in the top right corner Select Switch to quick listing tool Which sellers should use it? This tool is ideal for new or occasional sellers, simply because it is fast and easy to use. You will not get all of the features offered by other tools (see chart below), but if you're looking to list quickly, it's a great

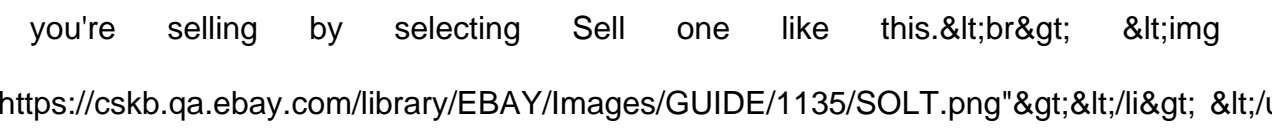

place to start.

- Internal Information

Not all sellers will have access to the QLT, depending on their listing frequency.

How it works:

- This tool uses eBay historic knowledge of the item, its pricing performance in each listing type, and associated shipping information to guide the seller through the completion of the listing.
- Describe the item you're selling in the Tell us what you're selling box.
- eBay will present similar items. You can choose the item that is closest to the one you're selling by selecting Sell one like this.

How much does it cost?

- The tool is free to access, but you will be charged listing fees in accordance with eBay's pricing structure.
- The tool includes a profit calculator, which estimates eBay fees and other costs to show you the money you can make from your listing.
- As you update your listing, the calculator will automatically use the information you enter to estimate your profits.
- Profits are based on your sale price (which is estimated for auction listings) minus eBay fees, PayPal fees, and shipping cost (if you have made shipping free for buyers). Any applicable discounts and promotions will be included as well.

Click the arrow beside "eBay fees:" to see a breakdown of specific fees.

Click for examples:

[fixed price](https://cskb.qa.ebay.com/library/EBAY/Images/GUIDE/1135/QLTfees-fixedprice.PNG),

[auction](https://cskb.qa.ebay.com/library/EBAY/Images/GUIDE/1135/QLTfees-auction1.PNG), and [auction with fees expanded](https://cskb.qa.ebay.com/library/EBAY/Images/GUIDE/1135/QLTfees-auction2.PNG).

Available categories:

- Currently, the Quick Listing Tool does not support listing in the following categories:
- Real Estate

Uploading photos via mobile / cell / smartphone Please see Adding photos to your listing for more information. FF002 error Please see Photo Error Codes in Adding photos to your listing for more information. Auto Relist feature Please see Relisting an item for more information. Draft listings The Quick Listing Tool will display up to 20 saved drafts. Sellers can also delete drafts that they no longer want (simply hover your mouse over the "saved listing" and click the X that appears). The Quick Listing Tool also saves (periodically) several aspects of a draft automatically (e.g., photos, title, description, price). Revising listings Once your listing is live, you can still revise it; it looks the same as when you first created the listing. When you revise an item that has been listed with the Quick Listing Tool, you can't switch to SYI form. You can only revise the fields that are on the Quick Listing Tool. Switching between forms Switching from the Quick Listing Tool to SYI - Your information will be carried over to SYI. Switching from SYI to the Quick Listing Tool - Your information will not be carried over. Motors fitment Parts compatibility (also known as "fitment") is available to Motors Parts & Accessories sellers in the Quick Listing Tool just as it is in the SYI form. </h2><h2>GUIDE.DETAILED_INFORMATION <a href="https://cskb.qa.ebay.com/csxbapp/art?page_content&id=GUIDE1135&ViewLocale=

The Quick Listing Tool contains all of the important fields to get an item listed, but to simplify the process, it doesn't contain every possible feature. Sellers looking for a specific feature not available in the QLT can always switch over to the

sell? box. Note: Only certain vehicle types are supported. Other vehicle types (e.g., aircraft) can be listed through the usual Quick Listing Tool process. The flow consists of 8 steps: Select the make of vehicle. You can search makes or sort by alphabetical order or popularity.

Choose the appropriate model.

If the model isn't included in the flow, it can be listed through the normal listing process. Choose the model year.

Choose a trim.

Choose the engine.

Choose the drive type.

Choose the exterior and interior color.

You'll be taken to a pre-filled form where you'll need to add other vehicle details, including condition, mileage, VIN, and photos. Then, once you've chosen a format and price, plus your preferred payment options, you can complete the listing. Item specific recommendations BOLT will automatically extract the item specifics based on the title and autofill for the sellers. For example, if your title description is NorthFace Blue Mens Jacket Large, in the the Item specifics of the listing form, eBay would automatically update Department as Men, Brand as NorthFace, Color as Blue etc Features for Item Specifics within the Quick Listing Tool (BOLT): Autofill based off

title
Product use case - catalog item where all the product specifics are already pre-filled
